Kerala Police Headquarters,  
Thiruvananthapuram,  
Dated: /04/2018.

EXECUTIVE DIRECTIVE NO.....17...../2018

Sub:- Installation of new applications and Systems-E-beat in Police department - Directions issued - Reg.

In order to cope up with the era of Information Technology, Police Department is developing and implementing a number of new applications /systems in various areas of work. These applications/systems are developed for increasing the efficiency/effectiveness of work in all area of policing. However unplanned installation and implementation can lead to undesired results also. Such a case was noticed in the implementation of the e-beat system. Therefore, in order to effectively implement new applications/System in Police Department following directions are issued.

1. New applications and systems may be introduced in Police Stations only after having a proper feasibility study by technically qualified and competent persons after taking into consideration of the views of the executive level officers.

2. Station House officers, Stations writers and other police personnel of each Police Station shall be properly briefed with the implementation of the system. If at any stage the system becomes failure in the absence of the monitoring from their part they will be held personally liable and appropriate action may be taken accordingly.

3. Secretary IT Department may be directed to provide sufficient space in Government server to host the software developed for the implementation of e-beat system.
